

I wish to express my opposition to the proposed rulemaking requiring broadcasters to make and store 24 hour recordings of their broadcast days. Given the large number of broadcasters who do not broadcast questionable or indecent programming, it is not fair to punish us for the actions of a relative few.

It would be burdensome, costly and difficult to find storage room for such an effort. I would suggest that any broadcaster who has a complaint filed against them be forced to record and store their programming for a period of time to insure no repeated violations.

However, to make this a requirement of ALL broadcasters, especially small market ones like mine, is punitive, unfair and promotes a "worst case" expectation of all broadcasters, which the record shows is simply not the case.

We are a satellite music affiliate, so we don't generate our own programming per se, which makes this rulemaking even more unnecessary.

I urge the Commission to REJECT this rulemaking for all broadcasters.

Sanford Cohen
